Your job listing mentions a need for someone who is experienced in Software Trainee segmentation and campaign development, both of which are areas I have bit experience in. Allow me to contribute to the team's success.

I look forward to discussing the Software Trainee position and my qualifications with you in more detail. I'm available to talk at your convenience. I'll be in touch next week to follow up and to make sure you've received my application.

*Thank you so much for your time and consideration.*

Sincerely,

SHIVA KUMAR K
